PROFILE

Junior developer with a broad technical background in Python, full-stack development, backend, databases, and APIs. Through projects and internship experience, I have built solutions focused on integrations, data flows, and problem-solving. At PodManager, I contributed to AI-driven features, backend logic, and web-based solutions. I learn quickly, take ownership, and enjoy roles where technology creates real value.

TECHNICAL SKILLS

Programming: Python, Bash, Javascript, Typescript

ML/AI: PyTorch, TensorFlow, LangChain, LLM, Machine Learning

Backend: Flask, FastAPI, REST API, API-utveckling, Testing

Data & Integration: SQL, MongoDB, API-integrations

Cloud & DevOps: Azure, AWS, Docker, Kubernetes, Git

Work Approach & Environments: Agile, troubleshooting, Linux, Windows

EDUCATION

Python Developer with a specialization in AI – Teknikhögskolan Gothenburg (2023–2025)
Higher Vocational Education (YH) diploma focused on Python, AI, backend, and practical system development. Completed 22 weeks of work-integrated learning (LIA) at a tech company.

WORK EXPERIENCE

AI&AppDeveloper, LIA – PodManager, Gothenburg (2025)

Developed AI-driven backend features, API integrations, and data flows using Python and Flask. Participated in code reviews and technical team discussions.

AI Developer, LIA – Linespotting AB, Kalmar (2024–2025)

Developed AI systems for identifying political corruption. Handled and preprocessed over 1 million rows of data and trained machine learning models.
